SKYLIS

Silis Group

Experience Greater Efficiency, Cost Savings, and Enhanced Visitor Satisfaction with Our Advanced Dispenser Technology

Silis Group is dedicated to redefining hygiene and operational management with innovative solutions. Founded with the mission to tackle common challenges in dispenser management, we noticed that all too often, empty or broken dispensers frequently compromised hygiene and efficiency in high-traffic areas.

John Rees

MANAGING DIRECTOR

In just over two years, we have made significant advancements in developing wireless technology that allows for real-time monitoring of dispenser levels. Our system ensures that both customers and staff are aware when dispensers need refilling, boosting efficiency, reducing costs, and enhancing the overall visitor experience.

Skylis

Discover Our Innovative Brand

Skylis is the flagship product line under Silis Group, epitomising innovation in wireless communication and dispenser technology. The name Skylis highlights our technology's ability to transmit data effortlessly through the 'sky' and 'skyrocket' operational efficiency with smart alerts. With these innovative features, Skylis technology offers unique advantages as the only system in the world that can be quickly and effortlessly retrofitted into any washroom environment. The system monitors and manages dispensers and other devices found in washrooms, such as hygiene bins and vending machines. By maintaining facilities at optimal levels, Skylis enhances user satisfaction and boosts performance standards.

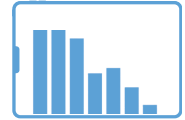

Dispensers installed with our smart tracking technology

Monitor all dispensers within a designated area to ensure timely refilling

Get instant alerts when dispenser levels or battery status run low, ensuring smooth and uninterrupted operation

Streamline operations with features that track customer feedback, log dispenser refills by time and date, outline staff cleaning protocols, and monitor stock levels at a glance

Skylis guarantees efficient facility management and a superior user experience through its advanced dispenser technology. The Skylis brand is synonymous with cost-effective and reliable washroom monitoring at every level.

Throughout this booklet, you will discover our range of Skylis products, each designed to transform your facility management experience.

S-Cube3

The World's Most Advanced Washroom Hygiene Monitor for Real-Time Customer Feedback and Dispenser Level Tracking

The S-Cube3 series revolutionises washroom management with cutting-edge technology that monitors customer feedback, tracks dispenser levels, and records toilet cubicle usage in real time. Designed to enhance operational efficiency and user satisfaction, the S-Cube3 keeps your facilities running at their best. The S-Cube3 also monitors and records data for comprehensive management reporting.

Customers can provide feedback or report any issues within the washroom

Staff can log in to view dispenser status, monitor cleaning protocols, and check stock levels in real time

Explore the S-Cube3 Series

Each S-Cube3 model is tailored to meet specific facility needs, ensuring optimal performance

Choose the perfect S-Cube3 model to meet your facility's needs. Whether you require essential functionality, enhanced communication, or the most advanced monitoring system with smart alerts and 4G connectivity for real-time data and reporting, the S-Cube3 series has the solution.

Model Overview:

Model M: Features an interactive touch screen that records visitor satisfaction, janitor activity, and cleaning times. Users can alert staff to washroom issues via the S-Cube3

Model S: The ultimate in functionality, with traffic-light dispenser monitoring for up to 60 dispensers per S-Cube3 and full autonomous on-site reporting

Model E: Adds smart alerts and 4G connectivity, allowing for complete data transfer and storage via the Cloud and integration of any number of S-Cube3s

Each S-Cube3 model is crafted to transform your washroom operations, delivering exceptional user satisfaction and maximising operational productivity.

OCCOOPS

Enhance Washroom Convenience with a Clear, Visible Occupancy Indicator

OCCOOPS is a reliable solution that helps customers, visitors, and, just as importantly, cleaning staff instantly determine if a washroom or cubicle is occupied. Strategically placed, OCCOOPS uses red and green lights to indicate occupancy status, significantly reducing waiting times and enhancing the user experience in high-traffic public spaces. Suitable for diverse environments, from restaurants to office buildings, OCCOOPS is a perfect fit wherever clear occupancy communication is essential.

Clear and Simple: Easy-to-understand red and green indicators

Universal Application: Ideal for various public settings, from large facilities to single-unit washrooms

Compact and Discreet: Designed to fit neatly above any door

Low Maintenance: Built for durability and reliability in high-traffic areas

OOPS

Monitor Occupancy and Keep Washrooms Fully Stocked with OOPS

OOPS takes washroom cubicle monitoring to the next level. In addition to indicating occupancy status, OOPS uses red and green lights to display availability while also providing critical information about washroom essentials. Through clear symbols and colour-coded lights, OOPS shows whether feminine hygiene bins are full (blue light) or if toilet paper is running low (amber light). Designed for ultimate convenience, OOPS keeps users and staff informed, promoting a cleaner and more efficient restroom experience.

Multi-Status Indicator: Red/green occupancy lights plus alerts for bin fullness and toilet paper supply

Colour-Coded Alerts: Amber indicates low toilet paper, while blue signals a full bin, helping to minimise disruptions

User-Friendly Symbols: Clear icons for instant recognition by users and maintenance staff

Improved Cleanliness: Timely maintenance alerts for a cleaner, better-stocked washroom experience

Skygiene

Revolutionising Hand Hygiene with Intelligent Reminders

Skygiene is an intelligent system designed to enhance hand sanitisation in healthcare settings, serving as both a monitoring and auditing tool. Through gentle reminders and alerts, Skygiene ensures everyone entering the facility adheres to essential hygiene practices, keeping infections at bay. From friendly prompts to firm reminders, Skygiene fosters a safer environment for everyone.

Gentle Reminders: Skygiene encourages hand sanitisation with friendly prompts upon entry

Instant Feedback: Notifies individuals if they miss sanitising their hands, ensuring compliance.

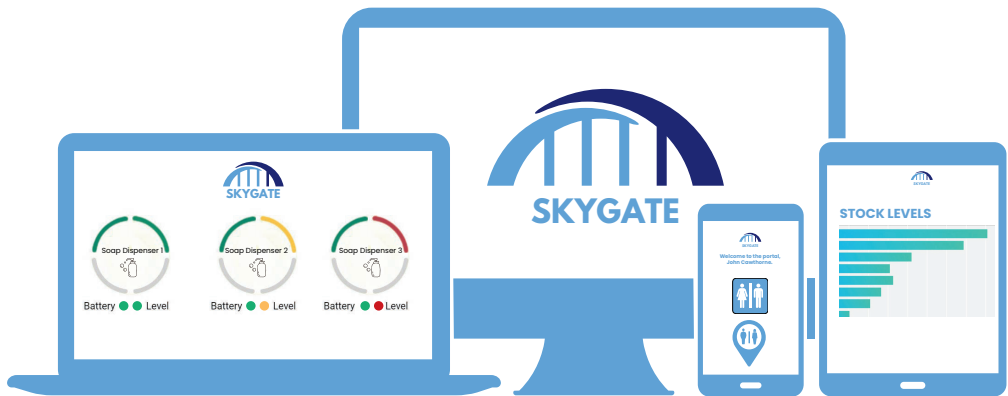

Enhanced Infection Control: Helps prevent the spread of germs in high-risk areas

Easy Monitoring: Tracks sanitiser usage and provides data for better hygiene oversight

Skygate

Real-Time Monitoring and Hassle-Free Restocking with Skygate

Skygate is an intuitive web app designed to help janitorial staff monitor dispenser levels and identify those requiring replenishment. It also enables staff to locate equipment using washroom maps and receive instant alerts to ensure timely restocking. Designed to enhance efficiency and maintain high hygiene standards, Skygate ensures smooth, hassle-free operations for your facilities.

Accurate Dispenser Monitoring: Easily view dispensers needing refilling and check their battery status with minimal delay

Washroom Map Interface: Easily locate dispensers using coded maps for quick recognition and servicing

Alert Indicators: Amber and red symbols indicate when dispensers are running low or empty, facilitating timely maintenance.

Tracking and Data Analysis: Monitor dispenser changes and use detailed data insights to plan restocking effectively

Enhanced Efficiency: Optimise maintenance schedules to ensure facilities remain fully stocked and operational at all times

Skyway

Smart Hygiene Monitoring for Hassle-Free Management with Skyway

Skyway, an advanced solution from Skylis, is designed to provide efficient and reliable monitoring for up to 12 dispensers of your choice within a designated area. This compact and cost-effective device ensures that you are instantly notified when dispensers need replenishing, helping you maintain high standards of hygiene effortlessly.

Skyway discreetly fits into stockrooms, offices, or any private location, ensuring staff stay informed with real-time alerts when dispensers need attention

Customisable Alerts: Program Skyway to flash, beep, or provide a voice notification when a dispenser requires attention

Discreet Design: The small, white device can be easily installed in private areas such as offices, stockrooms, or receptions

Enhanced Efficiency: Reduce downtime and ensure smooth operations with real-time alerts

Cost-Effective Solution: Affordable and easy to implement, making it ideal for businesses of all sizes

How Skyway Works

Skyway integrates seamlessly into your facility, connecting wirelessly to dispensers within its range. Once set up, it monitors dispenser levels continuously and alerts staff when action is needed, ensuring uninterrupted service.

- 🔊 **Customisable alerts:** Choose between beep or voice notifications, or opt for a flashlight alert to ensure
- ⚠️ **timely dispenser management**

Quick Setup: Installation takes minutes, with no complex wiring or technical expertise needed

Reliable Monitoring: Tracks dispenser levels and battery status with precision

Flexible Placement: Place it where staff can see or hear alerts, ensuring prompt response

Skyway is perfect for environments where hygiene is critical, such as offices, schools, and healthcare settings. With its real-time notifications, you can focus on what matters most—running your operations smoothly.
